

Amateur Radio Voice Operating Guidelines Exercise 2 Questions

1. Which frequencies may be used for a YCA/R net?

2. During a disaster, personnel and frequencies are to be assigned using which criterion?

3. How will the NCS structure all YCA/R nets?
 - a. YCA/R structure diagrams in the YCA/R training material
 - b. YCA/R requests at any given time
 - c. The principles of Incident Command
 - d. Requests made by NCS during the situation

4. Name the four groups of frequencies that may be set up during an emergency.

5. Identify the group frequency type of the following by putting the appropriate letter in the blank.

B Used to resolve amateur radio operations-related problems.

D The "front line" net during an incident. Typically used in a small area for a specific purpose.

A Primarily used to recruit operators and equipment.

C Frequencies (repeaters) belonging to individuals not having a prior agreement with YCA/R.

6. When is any means of communications allowed?

7. What must each station do before leaving the net frequency?

8. What must the NCS do if a station fails to check out and why?

9. What must an NCS do before closing down a net operation?

10. Which elements on the EOC Message Form will be used in lieu of a message number?

11. Should you modify the message content of a message originated by someone other than yourself to save time, to increase efficiency, and make it easier to understand?

12. What precedence should the reply to a message receive?
